

LOA 3m (10ft)  
 Sailing Beam 2.4m (8ft)  
 Empty Main Hull Weight 20kgs (45lbs)  
 Empty outrigger weight 5kgs (11lbs) each  
 Sail Area 5sqm (53sqft)  
 Draft 0.13m - 0.75m (5in - 2ft6in)

The Tryst trimaran is a variation on the Duo dinghy  
 The crossbeams fit onto the Duo wings and bolt to the outriggers  
 Both outriggers can be made from one sheet of 4 mm plywood  
 If a nesting Duo is built then the whole Tryst will fit inside a 6ft box  
 (eg in the back of a car or on a boat's foredeck)

All the major parts for the Tryst  
 can be cut from three sheets of 4mm (3/16in) plywood  
 and one sheet 6mm (includes daggerboard and rudder)
